

Summary of Changes to Measurement & Payment and Bid Items

August 15, 2006

M&P and bid item changes:

Approximately 87 new numbers were added under Section 02610 for Steel Pipe, Thermoplastic Pipe, and Concrete Pipe. These numbers are even numbers from 1004 – 1174 and the description requires the designer to define the pipe class. These numbers will replace approximately 330 existing numbers that will be turned off in the system in mid September, when the August Standards Meeting items are published.
